## INSTALLATION STEP

Remove the cap and the inner core of this floor drain.

Plaster a right amount of white cement mortar on the outer edge and beneath the cap of this floor drain respectively before covering the cap on the drain's opening. Make sure that the level of the cap is a little lower than the ground surface, and the outfall is aligned at the drain.

Put the inner core into the outfall and screw it up before covering the cap.

Please do not use it until 12 hours later or until confirmed fixed.

## CLEANING INSTRUCTIONS

Applicable to any processed surface: clean the coating surface with neutral suds and then wipe dry the entire surface with clean mull. Avoid by all means using the detergents like ammonia water, household cleanser, and bathroom cleaner, which will hurt plating surface. Any cleaning appliance or detergent which is abrasive cannot be used to a mounted water faucet and its fittings. Open the cap regularly to clean the sundries on the filter screen for smooth draining.
